

HIGH CARE COSMETICS®

The new Iono-Jet device

Iono-Jet

New plasma treatment for the cubicle

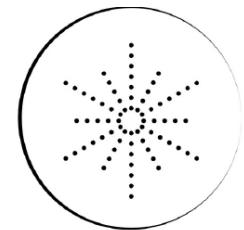

- Air is enriched with negative ions
- By means of high pressure serums, peptides and concentrates are channelled into the deep layers of skin.
- Counter electrodes neutralise through static charge,
- Plasma stimulates cell division and skin metabolism.
- **Concentrates** can penetrate deep down into the cell structures of the skin and develop to full effect there:
- The local circulation of the skin, cell metabolism and moisture-binding capacity are improved, regeneration processes are accelerated and the skin texture becomes smoother

Iono-Jet concentrates

The five concentrates which lead to success

- **Pre-treatment with Iono Jet Peeling**
- to prepare the skin optimally for the subsequent treatment
- contains proteases which split proteins into smaller units
 - dead cells are loosened and removed
- alcohol refreshes the skin and removes excess sebum and has an antimicrobial effect

Iono-Jet concentrates

The five concentrates which lead to success

- **Iono Jet Whitening**
- used mainly for age spots, dark spots and an irregular complexion, the skin becomes even and smooth
- active substance complex consisting of sulforaphane and genistein
 - targeted lightening effect

- **Iono Jet Nutrition**
- high-grade milk peptide complex makes dry skin supple
- plant-based emulsion of aloe vera, black cumin oil and sesame oil has a regenerative, antioxidant and protective effect
- vitamins activate the skin's own protective layer
 - prevent damage and ageing processes

Iono-Jet concentrates

The five concentrates which lead to success

4. Iono Jet Lifting

- used mainly for mature or slack skin
- brown macroalgae undaria pinnatifida directly targets the genes which are responsible for the formation and preservation of collagen, elastin and hyaluron acid

5. Iono Jet Detox

- extract from the stem cells of the heart-shaped globe daisy detoxifies the cells and rids them of unhealthy substances
- has a positive influence on cell regeneration
- re-stimulates the cell metabolism
- for radiant, young-looking skin
